My Hero Academia: World Heroes' Mission is an upcoming 2021 American action film directed by Justin Lin and  
written by Chris Morgan and Daniel Casey. A sequel to the 2017 film The Fate of the Furious, it will be the tenth  
installment in the Fast and the Furious franchise and the ninth film in the main series. The film will star Vin Diesel,  
Michelle Rodriguez, Jordana Brewster, Tyrese Gibson, Chris « Ludacris » Bridges, Nathalie Emmanuel, John Cena,  
Helen Mirren, Charlize Theron and Michael Rooker. June 2021 by Universal Pictures after being postponed due to  
the COVID-19 pandemic.

My Hero Academia: World Heroes' Mission (also known as My Hero Academia: World Heroes' Mission) is a 2021  
American action film directed by Justin Lin, who also wrote the screenplay with Daniel Casey. It is the sequel to The  
Fate of the Furious (2017), the ninth main installment, and the tenth full-length film released overall in the My Hero  
Academia: World Heroes' Mission franchise. My Hero Academia: World Heroes' Mission stars Vin Diesel, Michelle  
Rodriguez, Tyrese Gibson, Chris « Ludacris » Bridges, John Cena, Jordana Brewster, Nathalie Emmanuel, Sung  
Kang, Michael Rooker, Helen Mirren, Kurt Russell, and Charlize Theron. In the film, Dominic Toretto and the team  
come together to stop a world-shattering plot headed by Toretto's brother, Jakob.

With a ninth and tenth film confirmed since 2014, Lin was confirmed to be returning to direct My Hero Academia:  
World Heroes' Mission in October 2017, marking his return to the franchise since last directing My Hero Academia:  
World Heroes' Mission 6 (2013). It was later announced Lin would co-write My Hero Academia: World Heroes'  
Mission with Casey, thus becoming the first film since 2 Fast 2 Furious (2003) not to be written by Chris Morgan. The  
cast was finalized with the addition of Cena in June 2019 and principal photography began that same month and  
lasted until that November, with filming locations including London, Los Angeles, Tbilisi, and Thailand.

My Hero Academia: World Heroes' Mission was originally scheduled for worldwide release in April 2020, but was  
delayed several times, first due to the releases of My Hero Academia: World Heroes' Mission and No Time to Die  
(2021), and then the COVID-19 pandemic. It premiered in South Korea and was released internationally on May 19,  
2021, and released in the United States on June 25. The film received mixed reviews with praise for the stunts and  
Lin's direction but criticism for its unrealistic action sequences and formulaic script. It has grossed over \$428 million  
worldwide, making it the fourth-highest-grossing film of 2021.

In 1989, Jack Toretto participates in a race, with his sons Dominic and Jakob in his pit crew. Dom argues with rival  
racer Kenny Linder about his dirty tactics. As the race resumes, Linder's car clips Jack's bumper and causes the car  
to hit a wall and explode, killing him. After the crash, Linder has an altercation with Dom, who nearly beats him to  
death. Dom gets arrested and while serving his sentence, he recalls that Jakob had worked on Jack's car the day he

died, and realizes that Jakob killed their father. Upon release, Dom confronts and challenges Jakob to a race, forcing him to leave town when he loses.

In the present, Dom is retired, raising his son Brian with his wife, Letty Ortiz. Roman Pearce, Tej Parker, and Ramsey arrive with news of Mr. Nobody capturing Cipher, with his plane subsequently being attacked by rogue agents. The plane crashed in Montecito, Central America, and the team convinces Dom to help them find Mr. Nobody. Replaying the distress signal, Dom realizes Jakob is involved. Searching the plane, they find part of a device named Ares, which can hack into any computer-controlled weapons system; the team is then ambushed by a private army led by Jakob, who steals the device. The team rendezvous with Michael Stasiak en route to their safe house. Dom is reluctantly joined by his sister Mia, who wishes to help. The team learns that Han Lue has something to do with Ares, and Letty and Mia go to investigate.

Meanwhile, Jakob meets with Otto, his associate. Cipher is also waiting for him and, after failing to sway Jakob, tells him the other half of Ares is in Edinburgh. Dom meets his father's former mechanic, Buddy, who took Jakob in after his exile, and learns that Jakob is in London. Letty and Mia find Han, still alive, in Tokyo, along with his ward Elle. Roman and Tej recruit Sean Boswell, Twinkie, and Earl Hu, who has been working on a « rocket car ». In London, Dom meets Queenie Shaw, who gives him Jakob's location. Dom confronts Otto and Jakob, who tells Dom to leave. Otto has Dom arrested, but Leysa, an old friend of Dom, leads a squad of mercenaries to rescue him.

Tej, Roman, and Ramsey join Dom in Edinburgh, where Jakob is using a weapon that can generate a powerful electromagnetic field to steal the second Ares device. Tej and Roman find the truck containing the electromagnet; as they fight Otto's men, Ramsey commandeers the truck to chase after Otto. Dom intercepts Jakob and the two fight throughout the city. Before Otto can extract Jakob, Ramsey runs his car off the road, and Dom uses the electromagnet to capture Jakob.

Otto recruits Cipher to help him find Jakob. At the safe house, Han reveals he was assigned to protect Elle and Ares, as Elle's DNA is its final component. When one of Mr. Nobody's agents went rogue, they used Deckard Shaw to fake Han's death so he could protect Elle. Otto attacks the safe house and frees Jakob, who had been the rogue agent. Jakob reveals that Jack, wanting to escape his debts, instructed Jakob to tamper with his car so he could fake his death in an accident, but the plan went awry due to Linder's interference. Jakob and Otto kidnap Elle and take the second Ares device.

Otto then launches a satellite into orbit, while Jakob has Elle activate Ares. They begin uploading Ares to the satellite, moving throughout Tbilisi in an armored truck. Dom, Letty, Mia, Ramsey, and Han give chase to stop the upload. As Mia and Han try to breach the truck, Otto reveals he has no more use for Jakob, and throws him off the truck. Dom and Mia save him, and Jakob decides to help Dom access the truck. Using the rocket car, Tej and Roman enter orbit and ram themselves into the satellite, stopping the upload. Cipher, remotely flying an attack jet, bombs the truck and kills Otto in an attempt to kill Dom; Dom uses the ricocheting truck to destroy Cipher's plane. Dom and Mia reconcile with Jakob and allow him to escape in Dom's car. A spaceship returns Tej and Roman to Earth. The team celebrates their success with a barbecue. While preparing to say grace, Brian O'Conner arrives in his car in the driveway. In a mid-credits scene, Deckard is surprised when Han arrives at his door.

#### ◆◆◆ STREAMING MEDIA ◆◆◆

Streaming media is multimedia that is constantly received by and presented to an end-user while being delivered by a provider. The verb to stream refers to the process of delivering or obtaining media in this manner.[clarification needed] Streaming refers to the delivery method of the medium, rather than the medium itself. Distinguishing delivery method from the media distributed applies specifically to telecommunications networks, as most of the delivery systems are either inherently streaming (e.g. radio, television, streaming apps) or inherently non-streaming (e.g. books, video cassettes, audio CDs). There are challenges with streaming content on the Internet. For example, users whose Internet connection lacks sufficient bandwidth may experience stops, lags, or slow buffering of the content. And users lacking compatible hardware or software systems may be unable to stream certain content. Live streaming is the delivery of Internet content in real-time much as live television broadcasts content over the airwaves via a television signal. Live internet streaming requires a form of source media (e.g. a video camera, an audio interface, screen capture software), an encoder to digitize the content, a media publisher, and a content delivery network to distribute and deliver the content. Live streaming does not need to be recorded at the origination point, although it frequently is. Streaming is an alternative to file downloading, a process in which the end-user obtains the entire file for the content before watching or listening to it. Through streaming, an end-user can use their media player to start playing digital video or digital audio content before the entire file has been transmitted. The term “streaming media” can apply to media other than video and audio, such as live closed captioning, ticker tape, and real-time text, which are all considered “streaming text”. Elevator music was among the earliest popular music available as streaming media; nowadays Internet television is a common form of streamed media. Some popular streaming services include Netflix, Disney+, Hulu, Prime Video, the video sharing website YouTube, and other sites

which stream films and television shows; Apple Music, YouTube Music and Spotify, which stream music; and the video game live streaming site Twitch.

#### ◆◆◆ COPYRIGHT ◆◆◆

Copyright is a type of intellectual property that gives its owner the exclusive right to make copies of a creative work, usually for a limited time. The creative work may be in a literary, artistic, educational, or musical form. Copyright is intended to protect the original expression of an idea in the form of a creative work, but not the idea itself. A copyright is subject to limitations based on public interest considerations, such as the fair use doctrine in the United States. Some jurisdictions require “fixing” copyrighted works in a tangible form. It is often shared among multiple authors, each of whom holds a set of rights to use or license the work, and who are commonly referred to as rights holders. [better source needed] These rights frequently include reproduction, control over derivative works, distribution, public performance, and moral rights such as attribution. Copyrights can be granted by public law and are in that case considered “territorial rights”. This means that copyrights granted by the law of a certain state, do not extend beyond the territory of that specific jurisdiction. Copyrights of this type vary by country; many countries, and sometimes a large group of countries, have made agreements with other countries on procedures applicable when works “cross” national borders or national rights are inconsistent. Typically, the public law duration of a copyright expires 50 to 100 years after the creator dies, depending on the jurisdiction. Some countries require certain copyright formalities to establishing copyright, others recognize copyright in any completed work, without a formal registration. In general, many believe that the long copyright duration guarantees the better protection of works. However, several scholars argue that the longer duration does not improve the author’s earnings while impeding cultural creativity and diversity. On the contrast, a shortened copyright duration can increase the earnings of authors from their works and enhance cultural diversity and creativity.

#### ◆◆◆ MOVIES / FILM ◆◆◆

Movies, or films, are a type of visual communication which uses moving pictures and sound to tell stories or teach people something. Most people watch (view) movies as a type of entertainment or a way to have fun. For some people, fun movies can mean movies that make them laugh, while for others it can mean movies that make them cry, or feel afraid. It is widely believed that copyrights are a must to foster cultural diversity and creativity. However, Parc argues that contrary to prevailing beliefs, imitation and copying do not restrict cultural creativity or diversity but in fact support them further. This argument has been supported by many examples such as Millet and Van Gogh, Picasso, Manet, and Monet, etc. Most movies are made so that they can be shown on screen in Cinemas and at home. After movies are shown in Cinemas for a period of a few weeks or months, they may be marketed through several other medias. They are shown on pay television or cable television, and sold or rented on DVD disks or videocassette tapes, so that people can watch the movies at home. You can also download or stream movies. Older movies are shown on television broadcasting stations. A movie camera or video camera takes pictures very quickly, usually at 24 or 25 pictures (frames) every second. When a movie projector, a computer, or a television shows the pictures at that rate, it looks like the things shown in the set of pictures are really moving. Sound is either recorded at the same time, or added later. The sounds in a movie usually include the sounds of people talking (which is called dialogue), music (which is called the “soundtrack”), and sound effects, the sounds of activities that are happening in the movie (such as doors opening or guns being fired).

In the 20th century the camera used photographic film. The product is still often called a “film” even though there usually is no film. A genre is a word for a type of movie or a style of movie. Movies can be fictional (made up), or documentary (showing ‘real life’), or a mix of the two. Although hundreds of movies are made every year, there are very few that do not follow a small number of set plots, or stories. Some movies mix together two or more genres. Action movies have a lot of exciting effects like car chases and gun fights, involving stuntmen. They usually involve ‘goodies’ and ‘baddies’, so war and crime are common subjects. Action movies usually need very little effort to watch, since the plot is normally simple. For example, in Die Hard, terrorists take control of a skyscraper and ask for a big ransom in exchange for not killing the hostage workers. One hero somehow manages to save everyone. Action

movies do not usually make people cry, but if the action movie is also a drama, emotion will be involved. Adventure Movies usually involve a hero who sets out on a quest to save the world or loved ones.

### 👑👑👑 GOODS OF SERVICES 👑👑👑

Credit (from Latin credit, “(he/she/it) believes”) is the trust which allows one party to provide money or resources to another party wherein the second party does not reimburse the first party immediately (thereby generating a debt), but promises either to repay or return those resources (or other materials of equal value) at a later date.[1] In other words, credit is a method of making reciprocity formal, legally enforceable, and extensible to a large group of unrelated people. The resources provided may be financial (e.g. granting a loan), or they may consist of goods or services (e.g. consumer credit). Credit encompasses any form of deferred payment.[2] Credit is extended by a creditor, also known as a lender, to a debtor, also known as a borrower.

While the players who play a role in the film are referred to as actors (men) or actresses (women). There is also the term extras that are used as supporting characters with few roles in the film. This is different from the main actors who have bigger and more roles. Being an actor and an actress must be demanded to have good acting talent, which is in accordance with the theme of the film he is starring in. In certain scenes, the actor’s role can be replaced by a stuntman or a stuntman. The existence of a stuntman is important to replace the actors doing scenes that are difficult and extreme, which are usually found in action action films. Films can also be used to convey certain messages from the filmmaker. Some industries also use film to convey and represent their symbols and culture. Filmmaking is also a form of expression, thoughts, ideas, concepts, feelings and moods of a human being visualized in film. The film itself is mostly a fiction, although some are based on fact true stories or based on a true story.

There are also documentaries with original and real pictures, or biographical films that tell the story of a character. There are many other popular genre films, ranging from action films, horror films, comedy films, romantic films, fantasy films, thriller films, drama films, science fiction films, crime films, documentaries and others.

That’s a little information about the definition of film or movie. The information was quoted from various sources and references. Hope it can be useful.

### ▲▲▲ TV MOVIE ▲▲▲

The first television shows were experimental, sporadic broadcasts viewable only within a very short range from the broadcast tower starting in the 1930s. Televised events such as the 1936 Summer Olympics in Germany, the 1934 coronation of King George VI in the UK, and David Sarnoff’s famous introduction at the 1939 New York World’s Fair in the US spurred a growth in the medium, but World War II put a halt to development until after the war. The 1940 World MOVIE inspired many Americans to buy their first television set and then in 1948, the popular radio show Texaco Star Theater made the move and became the first weekly televised variety show, earning host Milton Berle the name “Mr Television” and demonstrating that the medium was a stable, modern form of entertainment which could attract advertisers. The first national live television broadcast in the US took place on September 4, 1951 when President Harry Truman’s speech at the Japanese Peace Treaty Conference in San Francisco was transmitted over AT&T’s transcontinental cable and microwave radio relay system to broadcast stations in local markets.

The first national color broadcast (the 1954 Tournament of Roses Parade) in the US occurred on January 1, 1954. During the following ten years most network broadcasts, and nearly all local programming, continued to be in black-and-white. A color transition was announced for the fall of 1965, during which over half of all network prime-time programming would be broadcast in color. The first all-color prime-time season came just one year later. In 19402, the last holdout among daytime network shows converted to color, resulting in the first completely all-color network season.

See also: List of genres § Film and television formats and genres Television shows are more varied than most other forms of media due to the wide variety of formats and genres that can be presented. A show may be fictional (as in comedies and dramas), or non-fictional (as in documentary, news, and reality television). It may be topical (as in the case of a local newscast and some made-for-television films), or historical (as in the case of many documentaries and fictional MOVIE). They could be primarily instructional or educational, or entertaining as is the case in situation comedy and game shows.[citation needed]

A drama program usually features a set of actors playing characters in a historical or contemporary setting. The program follows their lives and adventures. Before the 1980s, shows (except for soap opera-type serials) typically remained static without story arcs, and the main characters and premise changed little.[citation needed] If some change happened to the characters' lives during the episode, it was usually undone by the end. Because of this, the episodes could be broadcast in any order.[citation needed] Since the 1980s, many MOVIE feature progressive change in the plot, the characters, or both. For instance, Hill Street Blues and St. Elsewhere were two of the first American prime time drama television MOVIE to have this kind of dramatic structure,[4][better source needed] while the later MOVIE Babylon 5 further exemplifies such structure in that it had a predetermined story running over its intended five-season run.[citation needed] In "DC1&", it was reported that television was growing into a larger component of major media companies' revenues than film.[5] Some also noted the increase in quality of some television programs. In "DC1&", Academy-Award-winning film director Steven Soderbergh, commenting on ambiguity and complexity of character and narrative, stated: "I think those qualities are now being seen on television and that people who want to see stories that have those kinds of qualities are watching television.
